Dear Dr. Burke:

The North Carolina Medical Board (“Board”) has concluded its investigation regarding your care of Patient A. It is the Board’s decision not to commence formal proceedings against your license. However, the Board voted to issue you this public letter of concern. The Board does not consider a public letter of concern to be a disciplinary action or a limitation or restriction on your license.

In August 2018, Patient A, a 73-year-old male, presented to you for a chest CT scan with IV contrast. Patient A’s medical history included left lower lobectomy for a 3.2 cm pulmonary adenocarcinoma performed three and a half years earlier. When interpreting the results of the scan, you failed to identify a large left and a moderate right pulmonary emboli when looking for recurrent malignancy.

The Board is concerned that your care of Patient A may have failed to conform to the standards of acceptable and prevailing medical practice in North Carolina. The Board urges you to take steps to ensure the conduct giving rise to the Board’s concerns does not happen again. Otherwise, the Board may take additional action against your license to practice medicine. If that happens, this letter may be reviewed in determining the appropriate action.

This letter is a public record within the meaning of Chapter 132 of the North Carolina General Statutes and is subject to public inspection and dissemination as required by that law. It will be reported to the Federation of State Medical Boards.

Sincerely,

Michaux R. Kilpatrick, M.D., Ph.D.
President
